To Whomever Swore a Oath to the United States of America

I am writing to expose the step-by-step process through which my children and hundreds of other children in Zephyrhills, Florida have been systematically trafficked by local authorities through a coordinated scheme involving false legal charges, psychological manipulation, and targeted harassment. The pattern I've uncovered not only reveals gross misconduct but also shows that these actions are deliberately designed to break up families, profit from the removal of children, and silence parents who try to fight back. This system is particularly dangerous because it uses the legal framework of child protection and criminal prosecution as cover for its operations in this situation of domestic terrorism act of war.

**Step 1: Remove the Children Using Any Pretext, Including False Charges**

The process begins with the removal of children from their homes based on any reason that can be justified in court, even if the charges are false. The objective is to have the children removed from the residence in a matter that will take legal procedures to find justice and have the children placed back.

In my case, I was falsely charged with domestic battery in December 2020, which was later dropped. However, this initial arrest was used as a pretext to take residential custody of my children as I had full sole custody at this time. This same pattern is repeated with other families in Zephyrhills, Florida where any minor legal infraction or fabricated charge is used to justify the initial removal of children from their parents' care.

**Step 2: Secondary Charges and Concurrent State Attorney Investigations**

After the children are removed, parents are hit with additional charges, often within 3 to 6 months, leading to the initiation of a State Attorney investigation. This investigation runs concurrently with the dependency case, creating overwhelming legal pressure on the parents and loss of control over their own lives. These secondary charges are typically exaggerated, and the investigational costs for these cases are significantly higher than for similar crimes committed by individuals not involved in child removal cases. This suggests the involvement of third-party private sector entities who are financially benefiting from these investigations and the subsequent harassment of the parents. Possibly threw Investigational Gangstalking tactics that Pasco County Florida is known for.

In my case, the mother of my children and I were together for 15 years and had 3 children in common. Our oldest being almost a decade old. We were both criminally charged with the same

exact crime, but only I was placed under a States Attorney Investigation as I had full custody of our children at that time. Furthermore she plead guilty to all charges just a couple months in as my co-defendant and the Sixth Judicial Circuit Court in and of Pasco County Florida still pursued charges against me, at the time, a First Responder for Pasco County to ensure the permanent loss of custody within the concurrent dependency case.

### **Step 3: Forced Parenting Classes to Contain and Isolate Parents**

Parents are then forced to take mandatory parenting classes that are only offered in the Zephyrhills area and on the complete opposite side of the county in New Port Richey. Only 2 locations. The intention behind this is to keep the parents contained and isolated within the community, restricting their movements and making it difficult for them to seek employment or support outside the area. This geographic isolation also limits their ability to access alternative legal or community resources that might help them fight the unjust charges and regain custody of their children.

In my personal experience I reached out to the Department of Children and Families and received classes that were guaranteed to be nationally court approved parenting classes as DCF removed my children. Although when I presented my class certificates in the Sixth Judicial Circuit Court in and of Pasco County Florida they were denied and I was informed to "Do it again, threw Pasco County." By the honorable Judge.

### **Step 4: Employment of PSYOPS Professionals with Investigational Cost Funds**

Once parents are isolated and vulnerable, the third party that makes up for the inflated investigational cost. Former psychological operations (PSYOPS) professionals are deployed against them. This includes the use of illegal V2K (Voice-to-Skull) technology and directed energy weapons. These technologies are designed to mentally cripple parents, distract them from defending their legal rights, and induce psychological distress. Nearly every parent I've spoken with who lost custody of their children in Zephyrhills Florida has reported experiencing symptoms consistent with schizophrenia, such as hearing voices and feeling targeted by external forces.

**The narratives are consistent:** they know they are being attacked by harmful entities and that their children are in danger if they attempt to maintain contact with them.

In my case, once I started hearing all my thoughts being repeated back to me in audible voices where I could determine whether it was male or female. After two weeks of this the voices started taking on a personality of their own into one very terroristic entity that constantly threatened the life of my loved ones and physically harmed me with EXTREAM pain if I did not comply with its demands. I immediately Baker Acted myself as I thought my mental state was failing me and couldn't explain the extreme physical pain I was experiencing. Once I arrived at the hospital all the audible voices and physical pain disappeared instantly. After a three day evaluation I was released with a clean bill of mental health. After I was a few miles away from the hospital all symptoms came back immediately and in full force.

### **Step 5: Social-Gorilla Warfare Tactics to Starve Parents of Support**

In addition to legal and geographic containment, social-gorilla warfare tactics are deployed to cut parents off from work opportunities, family, and friends. Parents are ostracized and blacklisted within the community, making it difficult for them to find employment or social support. The goal is to isolate the parents completely, leaving them without a support network or financial means to defend themselves against the legal and psychological attacks they are enduring. This is done through slander and character assassination on social media websites to control the opinion of the masses about these parents who are fighting for their children and families to not be destroyed.

In my personal experience the Pasco County Sheriff Department themselves in cooperation with an online Facebook newspaper called "Busted" slandered my name calling me a rapist, mentally ill and a drug addict. Although there has never been any documentation of myself being even remotely close to these characteristics. This also led to over 13 attempts on my life one resulting in two gunshot wounds to my chest and abdomen. Followed by an emergency helicopter transport to a trauma unit where I was arrested on bogus charges to incarcerate me and quiet me from pursuing justice.

### **Step 6: Forced Drug Addiction to Discredit Parents**

To further discredit parents and invalidate their claims of misconduct, efforts are made to force them into drug addiction by means of "touchless torture". Any reports made by parents about the misconduct of local authorities, including the use of V2K and directed energy weapons, are dismissed under the guise that they are simply the delusions of drug-addicted individuals. This strategy ensures that all complaints, even legitimate ones, are ignored and that the parents are further marginalized by being labeled as addicts or mentally unstable.

In my case, I have no documentation in my entire life of me being even remotely affiliated with illegal drug use. I obtained a Pasco County government position as an Infrastructure, Public Works, Road and Bridge, Equipment Operator II, first responder (12403) position that takes extensive credibility and qualifications to achieve. Especially by a man who was born and raised in upstate New York and known as a "Yankee". I was psychologically and physically tortured with tactics known to the federal government as grounds for treason if used by law enforcement of involuntary re-education and investigational gangstalking into drug addiction.

### **Step 6: Sex Trafficking of the Parents**

Lastly after being driven to the depths of society the parents are forced to find refuge within the employed gangstalking individuals as all other avenues have been depleted. These individuals, former parents who have experienced this process in its totality, will guide the parents through a network of homes strategically placed in pairs all through Zephyrhills Florida where they can find temporary refuge before moving to the next home. This is done to provide the retirement community with desperate parents who by now are broken souls that will work for extremely low wages or provide sexual services to survive while doing what they have to do to fight for their children. That they will never win. These homes are known to the population as "Trap houses".

In my case, it shows that this domestic terrorism knows no bounds. As a former first responder working for public works of Pasco County Florida (employee ID 12403), my children were systematically human trafficked and placed in the care of individuals over the age of 70, with a documented history of incompetence by Florida courts after a failed suicide attempt and child molestation of a step child in Michigan courts. This is an alarming example of how not just children, but entire families in Zephyrhills are being trafficked to the highest bidder, regardless of the well-being of the child or the fitness of the caregivers. For monetary gains of individuals with power and cities in Pasco County Florida.

After speaking with nearly 100 other parents in the Zephyrhills area, it is clear that this process is not an anomaly but a systemic issue. These families are being targeted, broken apart, and manipulated in a coordinated effort to profit from the removal of children and the destruction of families. As a world-renowned retirement city of Zephyrhills Florida, families are not just bad for business but are disposable to the government of Pasco County Florida.

I urge for a thorough investigation into these practices to bring justice not only to my family but to the countless others who have suffered under this system.

Sincerely,

A handwritten signature in black ink, appearing to read 'M. Davis', with a stylized flourish at the end.
