To Whom It May Concern,

I am writing to urgently request intervention regarding the illegal use of restricted technology within Zephyrhills, Pasco County, Florida, that is being employed to enslave and torture citizens, including my family, to artificially inflate crime rates. This is evidently being done to keep local law enforcement agencies operational under false pretenses.

My family has been targeted and systematically torn apart through entrapment and the malicious prosecution of false charges by the Sixth Judicial Circuit Court of Pasco County. This was seemingly orchestrated to cover up the illegal removal and human trafficking of my children. My children's mother, Christina Renee Hills, who is the niece of Dean Marshall Hills Jr., a United States General of the Army-Marine Corps to my knowledge, and I are now subjected to severe torture until we comply with these unlawful actions through what I believe to be investigational technology.

I have spoken with 67 individuals within my community of Zephyrhills who have also lost their children to this system. These individuals, from various backgrounds, report similar experiences of pain, torture, and abuse at the hands of law enforcement, and in some cases, character assassination, forced drug addiction then overdose or suicide. To covered up murder of innocent citizens. This has been going on, to my knowledge, for generations.

In my research, I've observed a troubling pattern in my community where parents who have had their children taken by the system soon find themselves with an extensive criminal history. What's particularly striking is that the investigational costs of these criminal acts, which appear unrelated to the initial removal of the children, are significantly higher than those for individuals who have not experienced child removal. This disparity suggests that there may be a targeted and systematic effort to entrap these parents in legal troubles, compounding their hardships and further destabilizing their lives.

I am a Pasco County employee # 12403 with over 20 years of solid various work history and the father of three children. My family of five has endured many near-death experiences within a very short period. Despite reporting these alarming occurrences to numerous federal agencies and sending over 100 correspondences in the last four years, I have yet to receive a response.

Given the gravity of the situation and the lack of response from other federal agencies, I am pleading for military intervention in Pasco County, specifically in Zephyrhills. I believe that only the U.S. military has the capability to investigate and address these severe violations of human rights and civil liberties.

Thank you for your time and consideration. I implore you to act swiftly to prevent further harm to my family and other residents of my community.

Sincerely,

Matthew Aaron Davis
