To Whom It May Concern,

I am writing to bring your urgent attention to a systemic human trafficking and enslavement operation targeting innocent civilians in Zephyrhills, Florida, allegedly orchestrated by local law enforcement agencies for monetary gain. This situation involves the illegal use of restricted technology to control and exploit over 100 individuals creating an army of unconsented slaves, particularly those who have had their children taken by the state or have recently been released from incarceration.

According to numerous unofficial accounts, the local police with military influence are using children as leverage, combined with extreme forms of touchless physical and psychological torture, to force compliance. The goal appears to be to drive these individuals into drug addiction and criminal activity, thereby allowing law enforcement to gather intelligence and profit, rather than conducting their duties lawfully.

Disturbingly, individuals who have had their children removed by the state are disproportionately targeted with additional criminal charges. The investigation costs for these post child removal charges. Always seemingly unrelated to the child removal, are exponentially higher than similar cases involving individuals who have not had their children taken. These citizens are subsequently trapped in a cycle of repeated incarcerations in the county jail, without ever being sentenced to state prison, effectively enslaving them within the local judicial system for profit.

Over the past three years, I have personally spoken with 67 citizens who have suffered similar treatment. Alarming, many of these individuals exhibit symptoms of what appears to be induced schizophrenia, with exact delusional plotlines involving different entities. This suggests that military counter-terrorism weaponry might be in use, particularly considering the background of Mr. Michael Krause, the Director of the ILP Department at Pasco County Sheriff's Office. Mr. Krause's career path—from working with the Navy in Anti-Terrorism to the Florida Highway Patrol, and later the Pasco County Sheriff's Office—raises serious concerns about the deployment of such technology in our community, allegedly with no formal evidence.

Furthermore there are two other law enforcement officers within the local police department of Zephyrhills Florida who have active duty Army Reserves background. I do not have any proof of these mentioned individuals being involved; this is just an observation.

Given the severity and scope of these allegations, I implore the FBI to investigate this matter thoroughly. I also request that you review the arrest and court records of myself, Matthew Aaron Davis, and the mother of my children, Christina Renee Hills, the sister of former United States Army-Marine Corps General Mr. Dean Marshall Hills Jr. I believe these records will reveal extensive documentation of the abuse of power and the systemic human trafficking and enslavement of citizens within our community.

Thank you for your attention to this critical issue. I trust that the FBI will take immediate and appropriate action to protect our community and uphold justice. This is a request for an official investigation with the FBI.

Sincerely,

Matthew A. Davis
